Environmental Health in the Cayman Islands

The Department of Environmental Health (DEH) is a very dynamic and diverse department. It employs over 120 employees who work in different sections throughout the Cayman Islands.

Employees range from the very technical worker needing a Masters degree to the unskilled worker needing only a high school diploma. The DEH has job positions to cater to everyone's educational background.

The DEH consists of several service areas. Each area has specific roles and responsibilities that collectively result in the protection of the public from environmental health hazards.

Service areas include Management & Administration, Environmental Health Engineering, Food Hygiene & District Sanitation, Environmental Laboratory, Environmental Health Public Relations & Education and Information Technology.

The DEH employs people with a wide range of knowledge and skills needed to carry out the overall functions of the department.

Do you think that a career in Environmental Health could be right for you?
